A

Supplementary Figure 1. A CONSORT diagram with the screening and treatment assignments of patients consented to study. Patients treated according to Regimen A were treated on days 1, 5, and 8 of every 90-day treatment cycle. Additional patients were enrolled into cohorts exploring different dosing schedules, and correlative assays included these patients. In Regimen B, patients were treated on days 1, 8 , and 15 of every 6-week treatment cycle. In Regimen C, patients were treated on days 1, 5, and 8 of every 6-week treatment cycle. Tumor response assessments were made at least every 90 days for all patients.
